Data from
References to Emotion Words in the LDS Standard Works

Compiled by Emily S. Darowski, PhD, Charles D. Flint, Heather M. Seferovich, MA, and Ben Hill, PhD

Prefatory Note

In 2014, the *Bodies Filled with Light* exhibition opened at the Education in Zion Gallery at Brigham Young University. This exhibit paired anatomical drawings and scriptural references to body parts, and included a supplementary corpus of anatomical references (i.e., verses) in the LDS standard works.[1] Heather Seferovich, curator at the Education in Zion Gallery, began to explore other topics that are highly referenced in the scriptures and also have ties to curriculum on campus (e.g., geological references → geology courses). Her goal is to build exhibitions that fulfill the aims of a BYU education and are intellectually enlarging, spiritually strengthening, character building, and lead to lifelong learning and service.[2]

The following represents the data from the second corpus created with this goal in mind and centers on emotion words in the LDS standard works. Building this corpus was challenging for several reasons, including the complexity of words being translated from Greek and Hebrew, and because unlike body parts, an emotion word is not so easily defined. Developing our final list of emotion words and determining what references remained in the corpus was a multi-step, laborious process lasting about two years.

Various points are important to understanding how the data was derived from the scriptures. First, we identified 127 emotion words (e.g., joy) and every instance of these words, including all conjugations of the words (e.g., joyful, joyous). Second, we removed references that did not convey emotion.[3] Third, we also removed references that did not reflect emotions of a human personage.[4] Two corpuses of the remaining references can be found at emotionsinthescriptures.byu.edu. One presents the references by word (i.e., all references to admiration across the standard works, then adore, and so forth) and one presents the references by work (i.e., all references with emotion words in the Old Testament, followed by the New Testament, and so forth).

Each instance that remained was coded by two independent raters to determine if the emotion word reflected an emotion felt by a mortal human, deity (e.g., Jesus Christ, angel), or the adversary (e.g., Satan). Agreement between raters was over 90%. Any disagreements were discussed by two coders and a final coding was decided upon. If warranted by the context, some instances were dual-coded, or coded as being felt by two entities (e.g., human and deity). For example, Genesis 3:15 reads, "And I will put enmity between thee and the woman." This was coded as human and adversary because the word *enmity* conveys an emotion between two individuals, Eve and Satan.

---

[1] These include the Old Testament, New Testament, Book of Mormon, Doctrine and Covenants, and Pearl of Great Price.

[2] See aims.byu.edu.

[3] For example, the word *determined* is included in the corpus, but only cases that reflect "conviction." Verses that reflect "decided" were removed.

[4] Some verses refer to animals or elements conveying emotion. We retained verses that reflected emotion from a human entity (e.g., mortal or immortal). However, if a term like "earth" or "isles of the sea" was used and seemed to refer to the inhabitants of said location, the verse was kept.

In the data, the number of instances of a word may be more than the number of verses with that word. This occurred in cases where the word appeared more than once in the same verse. For example, in Genesis 25:28, "And Isaac loved Esau, because he did eat of his venison: but Rebekah loved Jacob," there are 2 instances of the word *love*, but it only counted as 1 verse. The number of codings of a word may be more than than the number of instances of that word. This occurred in cases where an instance of a word was dual-coded, as described above (e.g., in Genesis 3:15, there was 1 instance of the emotion word but 2 codings). Also, when verse data is presented by emotion word (i.e., in Table 3), these numbers contain duplicate verses (e.g., if a verse contained an instance of love and peace, it would be counted in the entry for love and for peace). When verse count data is presented by book and standard work (i.e., in Table 4), these numbers are deduplicated totals (e.g., if a verse contained the word love and peace, it is only counted once).

While we feel the work presented here is significant and valuable, we foresee future modifications to the data as we continue to scrutinize emotion words and how they are used within the scriptures. We invite all to browse through the data and engage in a personal study of emotion words in the scriptures. Exploring and researching scriptures in this manner can potentially bring greater understanding of God's word and His interactions with His children. We also welcome comments or feedback. Please send them to educationinzion@byu.edu with "emotions in the scriptures" in the subject line. You may also contact us for a more detailed account of our methodology.

Finally, to understand the presentation of the data in the tables below, please refer to the following guide.

Term or Abbreviation	Definition or Unabbreviated Version
Simplified Word	Each emotion word is identified by one conjugation of the word.
Total	Refers to the sum of numbers across a row or column
I	Refers to the number of instances of an emotion word
V	Refers to the number of verses containing an emotion word
OT	Old Testament
NT	New Testament
BOM	Book of Mormon
DC	Doctrine and Covenants
PGP	Pearl of Great Price
JST	Joseph Smith Translation
H	Human Coding
D	Deity Coding
A	Adversary Coding

Table 1. The number of instances of each emotion word included in the corpus, ordered from highest frequency to lowest. See the Prefatory Note for an expanation of abbreviations.

Simplified Word	Total I	OT I	NT I	BOM I	DC I	PGP I	JST I

Table 3. The number of verses in the corpus containing at least one instance of each emotion word, ordered from highest frequency to lowest. These numbers contain duplicate totals (e.g., if a verse contained an instance of love and peace, it would be counted under the entry for love and for peace). De-duplicated totals are provided in Table 4. See the Prefatory Note for an expansion of abbreviations.

Table 4. Total number of verses with emotion words by standard work and book, total number of overall verses by standard work and book, and percentage of verses within a work/book that have at least one emotion word. These these numbers do not contain duplicates (e.g., if a verse contained the word love and peace, it is only counted once here; see Table 3 where verse counts are presented by word and are not de-duplicated). See the Prefatory Note for an explanation of abbreviations.

		Number of Verses with at Least One Emotion Word	Total Number of Verses in the Book/Work	Percentage = (Number of verses with at least one emotion word) / (Total number of verses in the book/work)
